

Pick a Career in Chemistry

Agricultural chemist	Pyrotechnic chemist
Analytical chemist	Food chemist
Astronomical chemist	Geo-chemist
Bio-chemist	Diamond chemist
Forensic chemist	Medical chemist
Chemical Engineer	Nano chemist
Cryogenic chemist	Nuclear chemist
Electro-chemist	Photo chemist
Environmental chemist	Solid state battery chemist

Create Slides

You Need to Include These Things

It needs to be **visually appealing**.

It needs to be **creative**.

It needs to contain **lots of information**.

It needs to **contain pictures** of what that career looks like.

Ideas

- annual salary
- duties and responsibilities
- working conditions
- possibilities for advancement
- What it is you might LOVE about this career.
- What research would you get to do?
- What problems do chemists in this career solve?
- Typical experiments performed
- Tools and equipment used
- Workplaces and environments
- People they work with
- Important skills needed
- Education and training required
- University programs related to the career
- Certifications or licenses required
- Industries that hire this type of chemist
- A typical day in the job
- Major discoveries in this field
- Current research in this field
- Challenges of the career
- Safety considerations in the job
- Technologies used in the field
- How this career impacts society
- Environmental impact of the work
- Famous scientists in this field
- Important companies or organizations in this field
- Future developments in this area of chemistry
- Demand for this career in the future
- Related careers
- Opportunities for advancement
- Leadership roles in the field
- Research areas you could specialize in
- Reasons someone might not enjoy this career
